

always be innovative

BLR. SYSTEM

WHO WE ARE

We are a company with extensive experience in IT consulting, Internet of Things (IoT) and advanced technology solutions, offering consulting and complete solutions for cloud-connected devices, from the device in the field to the platform.

STORY

Blr. System was founded in 2020 by Andrea Padovan, the current CEO, with 20 years of experience in IT and the management of innovative international projects. His vision is to create a cutting-edge company dedicated to technological innovation. Today, we are committed to providing IT consulting and advanced technology solutions to make the future smarter and more connected.

SERVICES

- **Technology consulting** to overcome specific challenges and adopt cutting-edge technologies.
- **Personal training** to manage emerging technologies
- **Customised software development** for applications, firmware and software for connected devices.
- **Research and Innovation:** We are committed to the constant search for the latest technological innovations and provide research services to help companies remain competitive.
- **Selection of International Solutions:** We partner with trusted international companies to offer advanced technology solutions, helping companies identify, evaluate and adopt global solutions.

Our range of services is designed to ensure that companies are aligned with the latest technology trends and are able to make the most of the opportunities offered by technological evolution.

MISSION

Blr. System was born out of a passion for solving complex challenges and a desire to make a difference in the world.

Our mission is to follow the principles of Bushidō (武士道), providing expert advice and cutting-edge technology solutions to help our clients fully understand their journey and achieve success in the digital age, inspired by values such as honour, discipline, courage, loyalty and long-term vision.

always be innovative

TEAM

We have assembled a team of highly skilled international professionals, each dedicated to his or her field, our team is united by a passion for innovation and a dedication to ensuring the success of companies in the digital age.

We believe that our clients are an integral part of our team, and we are part of theirs. We collaborate synergistically, combining skills and resources to successfully tackle projects and challenges.
